### **DETAILED ACTION**

Claims 1-20 are pending in the application.

#### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 3-6, 8-11 and 18-20, drawn to the compounds, compositions, process of preparing and method of use of the compounds of formula I where formula I is a bicyclic ring system.

Group II, claim(s) 1-8 and 12-20, drawn to the compounds, compositions, process of preparing and method of use of the compounds of formula I where formula I is a tricyclic ring system.

Group III, claim(s) 1-6, 12-15 and 17-20, drawn to the compounds, compositions, process of preparing and method of use of the compounds of formula I where formula I is a tetracyclic ring system.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the inventions of Groups I-III are drawn to structurally dissimilar compounds and processes of preparing. They are made and used independently. One does not require the other for their use.

If, say, the benzodiazepines of Group I, were anticipated, applicants would not acquiesce in the objection of any of the Groups II-III there over or vice-versa and, thus, they are not linked to the same or corresponding special technical features.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

**Tentative election of a single species within the elected group is further required.**

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
